DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 27-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bellamy et al (US 4,747,783) in view of Cowie et al (US 5,236,789).

Bellamy et al disclose a connector assembly comprising:

a first electrical contact (11);

a second or mating contact (19);

the first electrical contact having a conductive portion (11) and a resistive portion (13), the resistive portion exposed for direct engagement with the second contact.

Bellamy et al substantially disclose the claimed invention except the resistive portion is in direct contact with the conductive portion.

Cowie et al teach a contact (16) comprising two different materials (18, 20) in direct contact with each other to provide a good electrical conduction.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a resistive material in direct contact with a conductive material onto the contact of Bellamy et al, as taught by Cowie et al to provide a good electrical conduction.

Response to Arguments

3. Applicant's arguments filed on 10/9/02 have been fully considered but they are not persuasive.

a) in response to applicant's argument on page 2, lines 14-26, the examiner respectfully disagrees. The phrase "Bellamy et al substantially disclose the claimed invention except the resistive portion is indirect contact with the conductive portion" means that the resistive portion is not in direct contact with the conductive portion. The terminology of "except" is the same meaning of "not". The examiner introduces the reference of Cowie for a teaching of two different resistive material being direct contact to each other. Cowie's teaching is then incorporate into Bellamy et al's contact. The phrase above is not a confusing statement.

b) in response to applicant's argument on page 2, line 27 to page 4 line 7, the examiner respectfully disagrees.

The Examiner recognizes that references cannot be arbitrarily combined and that there must some reason why one skilled in the art would be motivated to make the proposed combination of primary and secondary references. *In re Nomiya*, 184 USPQ 607 (CCPA 1975). However, there is no requirement that a motivation to make the modification be expressly articulated. The test for combining references is that the combination of disclosures taken as a whole would suggest to one of ordinary sill in the art. *In re McLaughlin*, 170 USPQ 209 (CCPA 1971). References are evaluated by what they suggest to one versed in the art, rather than by their specific disclosures. *In re Bozek*, 163 UPSQ 545 (CCPA 1969).

Art Unit: 2833

In this case, the examiner only use the reference of Cowie for a teaching of two different resistive materials being direct contact to each other.

Conclusion

This is a **THIS ACTION IS MADE FINAL**. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
